

# Learning Mathematics with Homework Help

## Locker Assignment

Teachers,

You are invited to use the Homework Help website as a learning tool for your students. Using the attached template, design a question and distribute this handout to 2 - 3 students in your class.

Have the students go to the Homework Help website, go to a Tutor Chat room, and get an answer for this question. The work they do with the tutor will be automatically saved in their locker, which is accessible 24 hours a day, 7 days a week.

They can share their results with the rest of the class, confident in their understanding of the concept.

For further information and sample questions for Grades 7 through 10 Mathematics, please contact:
