Ontario Youth Apprenticeship Program

Automotive Service Technician

Driving Your Future!

Automotive Service Technicians keep your car running and make sure you're safe behind the wheel!

Here are just **some** of the duties performed by Automotive Service Technicians:

- Perform scheduled maintenance services (such as oil changes, tune-ups and lubrications)
- Advise customers on general vehicle condition and possible repair needs
- Inspect motors, automotive systems and components, using various devices to help diagnose and isolate problems
- Adjust, repair or replace parts of automotive systems (including fuel, brake, steering and suspension systems; transmissions; emission-control and exhaust systems; engines; and electrical, cooling and climate-control systems).

What is the Ontario Youth Apprenticeship Program (OYAP)?

OYAP is an exciting way for students to learn a skilled trade, while completing their Ontario Secondary School Diploma (OSSD). The program is available to full time students who are at least **16 years of age** and who have completed the credit requirements for grade 10. Student can participate in OYAP in three different ways, which include:

- 1) OYAP/CO-OP** - students will participate in a co-op placement, in an apprenticeable trade area, to determine their skills and suitability for that trade.
- 2) Registered OYAP/CO-OP** - students will continue their co-op with the same, or new, employer and will be registered as an apprentice with the Ministry of Training Colleges and Universities (MTCU) - Apprenticeship Branch. At the time of registration, the hours at the co-op placement will count towards the required apprenticeship hours under two conditions: 1) the skills practiced in the workplace directly relate to the apprenticeship and 2) the employer is willing to sponsor the student and count the hours accumulated.

- 3) Registered Level 1 OYAP** - students who have been registered as an Apprentice with MTCU, may have the opportunity to complete the first 'in-school' portion of their apprenticeship training. This Level 1 training is held at an approved Community College or Training Centre. This allows students to obtain their OSSD, accumulate hours towards their apprenticeship AND complete the 1st level of apprenticeship training at the same time!

How does the Automotive Service Technician Program Work ?

This program will allow students to complete the **first session** of the three "in-school" sessions needed for the Automotive Service Technician apprenticeship training.

An Automotive Service Technician requires approx. 9000 work hours (about 4 ½ years) including three 8-week in-school sessions. The program will take place at Loyalist College during the second semester. The **Level 1** Apprenticeship program is 240 hours in length. To be successful in the first in-school session, the student will be required to meet the training requirements of the Ministry of Training, Colleges and Universities.

Although there will be no secondary school credits attached to the Loyalist College "in-school" program, the training program and secondary school schedules have been set up to allow students the time necessary to complete three secondary school credits.
